Subject: when you are back

Welcome back John. When you get time, maybe we can discuss how to handle this mini onslaught of requests for EPA involvement in CA sites, like Exide, Zeneca, Wildomar, and Riverside Ag Park. We talked about it at a 9:00 this week when you were out, and thought a conversation between the three of us might be good. One thought raised was reinstituting quarterly meetings and going over the list then, another was raising these to the new three person oversight panel for DTSC, and yet another was assigning one person in Superfund to keep track of this list and maintain communication with the state and the rest of us.

If any of this makes sense just let us know when you are caught up and can kick around ideas.

Clancy Tenley

Assistant Director

Superfund Division
